

FINANCIAL ACCOUNTING

PROJECT TOPICS

1. Will financial accounting help to reduce risk management?
2. Is there a need for regulation in financial reporting and why?
3. What is the importance of external auditing for the prevention of fraudulent activities?
4. Make a list of non-profit accounting measures and why financial reporting requirements are important
5. Review how auditing impacts the financial position of a specific business
6. Would the world prosper from international accounting standards or should every region use their own?
7. Can accounts software help to keep costs down?
8. Give an informed review on credit rating agencies and what their role is in a financial crisis
9. Make a review of the cash flow reporting practices around the world
10. Have commercial banks adapted to the changes demanded by corporate entities and how?
11. What is a major cause of financial instability within many of the big businesses?
12. Review international financial reporting standards adoption in the US and its effect on value relevance to information in accounts.
13. Explain how important the role of GAAP is in modern day accounting
14. Should the accountant be responsible for all debt management?
15. How do some companies minimize their tax liabilities and still ensure profitability?

16. What is the long term impact of the growing population of graduates in accounting around the world?
17. How do long term debts affect an organization?
18. Should accounting standards change with evolving technology and why
19. A study on the modes of fixed asset financing and efficacy of these modes
20. What are the dangers of creative accounting for investors and companies?
21. Can the balance sheet reliably provide a measure of a company's financial standing?
22. Is bankruptcy forecasting a reliable method based on the financial ratio analysis?
23. What are the connections between financial and environmental accounting?
24. Compare true profit from accounting profit
25. The impact of organization culture on the procedures and techniques of accounting
26. Review the global practices in accounting for fixed assets
27. What contributions has the accounting industry made to society, if any?
28. Do organizations need a separate finance department? And why
29. The advantages and disadvantages of lean accounting
30. What would financial statements appear without the use of accounting standards?
31. How has financial accounting transformed over the years?
32. Describe why debt management is important and the challenges associated with it
33. What are the criteria used by many large banks to assess long term loans?

34. Differentiate between global financial reporting practices and their influence on consolidated financial statements of multinationals
35. Transparency and accountability measures surrounding microloan disclosure practices
36. Is the development of the International Financial Reporting Standard beneficial for small and medium-sized bodies?
37. Why the need to reduce subsidies and the impact of doing so?
38. Why is business accounting so important in today's economy with the spread and continued growth of ecommerce?
39. What are the ethical and legal obligations that cannot be taken for granted for accountants
40. List the responsibilities of the financial accounting standard board and what its role is in preventing crime
41. How are many younger accountants creating a name for themselves within their accounting firms?
42. Is correct financial reporting vital to ensuring your customer's confidence?
43. Is there a need to change the standards within accountancy to better reflect evolving technology?
44. Why do some companies lie in their accounting books and reports?
45. Realizing financial services for the rural population: What are the challenges of retail banking?
46. Has computerized accounting taken over completely or is there still a role for manual accounting?
47. Can computers and accounting software improve productivity?
48. Are current accounting standards the best they have ever been?
49. Is it beneficial for companies to safely keep their financial instruments?
50. Do only large companies need accounting?
